

Curriculum for
Diploma Programme in
LEATHER TECHNOLOGY

For the State of Punjab

First Year (NSQF Level 3)

Prepared by:

Curriculum Development Centre
National Institute of
Technical Teachers Training and Research
Sector 26, Chandigarh - 160 019

August, 2023

EMPLOYMENT OPPORTUNITIES FOR DIPLOMA HOLDERS IN LEATHER TECHNOLOGY

Following are the major employment avenues for a diploma holder in Leather Technology:

A. Wage Employment

- Leather Tanneries
- Leather Export Houses including traders and inspection agencies
- Testing Laboratories (Public and Private)
- Footwear, Leather Products, Upholstry Manufacturing House/Industries
- Khadi and Village Industry Commission and Khadi and Village Industry Board
- Leather Chemical Industries/Marketing
- Small Industries Service Institute
- Research and Development Institutions/Organizations
- Educational Institutions
- Government Organization like Defense organization, Ordnance Factories etc
- Banks
- District Industries Centre
- Automobile industries
- Railway coach factories
- Sports Industries
- Social Welfare Department
- Custom and Excise

B. Self employed/freelancer/entrepreneur to

- Start their own leather processing units for manufacturing different types of leather
- Establish leather and chemical testing units
- Work as an ancillary to a big leather industry
- Supply raw materials and sell the finished goods
- Set up industry based on bye-products of leather and tannery wastes
- Carry out marketing of wet blue and finished leather

Some of the diploma holders in leather technology may also find employment in State Leather Corporation, Export Houses, Council for Leather Exports, Social Welfare Departments, BIS, Vocational Schools, Custom Departments, Manufacturers of artificial limbs for persons with Orthopedic disabilities etc.

After first year, the NSQF Level – 3 pass out students have avenues to work as semi skilled employee. Similarly, after second year, the NSQF Level – 4 pass out students have wide scope to work as skilled employee in Leather Technology related industries.

LEARNING OUTCOMES OF DIPLOMA PROGRAMME IN LEATHER TECHNOLOGY

At the end of the programme, a diploma holder in leather technology will be able to ::

1. Comprehend characteristics and properties of raw materials used (hides, skins and chemicals etc) for manufacturing different types of leathers for different end uses.
2. Select and grade raw hides and skins for manufacture of different types of leather.
3. Test and check the /quality of various chemicals used in leather processing units/tannery.
4. Comprehend the manufacturing of footwear and leather products.
5. Comprehend various types of leather processes for different end uses.
6. Select most appropriate leather tanning method/technique for various types of leathers.
7. Test leather quality according to prescribed standards of quality at different stages of leather processing.
8. Select and categorize different types of leathers produced.
9. Measure, weigh and packaging of different types and qualities of leather.
10. Make an estimate of the unit cost of manufactured leather taking into account all the input cost factors for processing of leather.
11. Use computer and computerized machines for various processes involved in leather tanning and management.
12. Comprehend the characteristics of effluent; treatment required for its safe disposal as per the BIS/ISO standards; layout, construction and operation of effluent treatment plant.
13. Provide assistance in selecting, installing, maintaining and undertaking minor repair and periodical maintenance of machinery used for carrying out different operations in a tannery.
14. Demonstrate correct techniques for accomplishing mechanized operations in a tannery to the other workers and supervise different operations of different units of leather manufacturing process.
15. Manage different resources and operations involved in the manufacture of leather, leather footwear and leather goods.

16. Collaborate with different organizations for networking of resources and select appropriate marketing strategies.
17. Maintain good working conditions, take safety precautions and implement labour welfare schemes in tanneries, leather footwear and leather goods manufacturing units.
18. Select site and prepare layout of tannery based on techno-economic market research.
19. Prepare feasibility-profit reports for starting new tanneries.
20. Communicate effectively with others.
21. Plan and execute given task/project as a team member or leader.
22. Use computer and IT tools for creating document, making spread sheet and making presentation.
23. Use appropriate practices for conservation and prevention of environment pollution.
24. Solve real life problems by application of acquired knowledge and skills.
25. Apply basic principles of mathematics and science to solve engineering problems.
26. Explore interest and passion in areas other than professional stream.

STUDY AND EVALUATION SCHEME FOR DIPLOMA IN LEATHER TECHNOLOGY

FIRST SEMESTER

Sr. No.	SUBJECTS	STUDY SCHEME Hours/Week			MARKS IN EVALUATION SCHEME									Total Marks of Int. & Ext.
					INTERNAL ASSESSMENT			EXTERNAL ASSESSMENT						
		L/T	P	Cr	Th	Pr	Tot	Th	Hrs	Pr	Hrs	Tot		
1.1	*English and Communication Skills - I	3	2	4	20	10	30	50	3	20	3	70	100	
1.2	*Applied Mathematics – I	4	-	4	40	-	40	60	3	-	-	60	100	
1.3	* Applied Physics-I	3	2	4	20	10	30	50	3	20	3	70	100	
1.4	* Applied Chemistry	3	2	4	20	10	30	50	3	20	3	70	100	
1.5	*Basics of Information Technology	-	2	1	-	40	40	-	-	60	3	60	100	
1.6	*Engineering Drawing-I	-	6	3	-	50	50	50	3	-	-	50	100	
1.7	*General Workshop Practice – I	-	6	3	-	50	50	-	-	50	3	50	100	
	#Student Centred Activities including Traffic Awareness and Road Safety Camp (I)	-	2	-	-	-	-	-	-	-	-	-	-	
	Total	13	22	23	100	170	270	260	-	170	-	430	700	

* Common course with other diploma programmes

SCA will comprise of co-curricular activities like extension lectures, games, hobby clubs e.g. photography etc., seminars, declamation contests, educational field visits, N.C.C., NSS, Cultural Activities and other activities to promote experiential learning.

SECOND SEMESTER

Sr. No..	SUBJECTS	STUDY SCHEME Hours/Week			MARKS IN EVALUATION SCHEME									Total Marks of Int. & Ext.
					INTERNAL ASSESSMENT			EXTERNAL ASSESSMENT						
		L/T	P	Cr	Th	Pr	Tot	Th	Hrs	Pr	Hrs	Tot		
2.1	*English and Communication Skills - II	3	2	4	20	10	30	50	3	20	3	70	100

2.5	**Basic Engineering	2	2	3	20	10	30	50	3	20	3	70	100	
2.6	Leather Manufacture I	3	6	6	10	20	30	50	3	20	3	70	100	
2.7	Organic Chemistry I	3	2	4	20	10	30	50	3	20	3	70	100	
#Student Centred Activities including Traffic Awareness and Road Safety Camp (II)		-	3	-										
Total		18	17	25	170	60	230	370	-	100	-	470	700	

* Common Course with other diploma programmes

** Common Course with diploma in Leather Technology (Footwear)

SCA will comprise of co-curricular activities like extension lectures, games, hobby clubs e.g. photography etc., seminars, declamation contests, educational field visits, N.C.C., NSS, Cultural Activities and other activities to promote experiential learning.

1.1 ENGLISH AND COMMUNICATION SKILLS – I

L	P
3	2

RATIONALE

Communication skills play an important role in career development. This subject aims at introducing basic concepts of communication besides laying emphasis on developing listening, speaking, reading and writing skills.

LEARNING OUTCOMES

After undergoing the subject, the student will be able to:

- Pronounce properly.
- Overcome communication barriers.
- Write legibly and effectively.
- Listen in proper prospective.
- Read various genres adopting different reading techniques.
- Converse logically.

DETAILED CONTENTS

- | | | |
|-----|--|----------|
| 1. | Basics of Communication | (12 hrs) |
| 1.1 | Definition and process of communication | |
| 1.2 | Introduction to types of communication - formal and informal, oral and written, verbal and non-verbal | |
| 1.3 | Objectives of communication | |
| 1.4 | Essentials of communication | |
| 1.5 | Introduction to channels of communication - formal (upward, downward, diagonal, horizontal), informal (grapevine, consensus) | |
| 1.6 | Barriers to communication | |
| 2. | Functional Grammar and Vocabulary | (12 hrs) |
| 2.1 | Parts of speech | |
| 2.2 | Article | |
| 2.3 | Tenses | |
| 2.4 | Subject verb agreement sentences | |
| 2.5 | Active and passive voice | |
| 2.6 | Synonyms and antonyms | |
| 2.7 | Pair of words | |
| 2.8 | Correction of incorrect sentences | |

3. Listening (04 hrs)
- 3.1 Meaning of listening
 - 3.2 Listening and hearing
 - 3.3 Importance of listening
 - 3.4 Active listening – Meaning and strategies
 - 3.5 Methods to improve listening skills
4. Speaking (03 hrs)
- 4.1 Importance
 - 4.2 Methods to improve speaking
5. Reading (12 hrs)
- 5.1 Meaning
 - 5.2 Techniques of reading: skimming, scanning, intensive and extensive reading
 - 5.3 Comprehension, vocabulary enrichment and grammar exercises based on following readings:
- Section - I
- My Struggle for an Education – Booker T. Washington
 - Abraham Lincoln’s letter to his son’s headmaster – Abraham Lincoln
 - Gateman’s Gift – R.K Narayan
 - The Selfish Giant - Oscar Wilde
- Section - II
- Say Not, the Struggle Nought Availeth – A H Clough
 - Stopping by Woods on a Snowy Evening – Robert Frost
 - Where the Mind is Without Fear – Rabindranath Tagore
6. Writing (02 hrs)
- 6.1 Significance and effectiveness of writing
 - 6.2 Paragraph writing – Word choice, sentence formation and construction of paragraph.

LIST OF PRACTICALS

1. Self and peer introduction
2. Newspaper reading
3. Just a Minute session – extempore
4. Situational conversation and role play
5. Language learning using open source software.

6. Greetings for different occasions
7. Improving pronunciation through tongue twisters.

INSTRUCTIONAL STRATEGY

Open source software should be used to help the students in developing listening skills. Student centred activities such as group discussions, role play should be used to ensure active participation of students in the classroom.

RECOMMENDED BOOKS

1. Revathi, Srinivas, “Communicating Effectively in English, Book-I”, Abhishek Publications, Chandigarh.
2. Mohan, Krishna & Meera Banerji, “Developing Communication Skills (2nd Edition)”, Published by Macmillan Publishers India Ltd; New Delhi.
3. Eastwood, John, “Oxford Practice Grammar”, Oxford University Press, London
4. Chadha, R. K., “Communication Techniques and Skills”, Dhanpat Rai Publications, New Delhi.
5. Wren & Martin, “High School English Grammar and Composition”, S. Chand & Company Ltd., Delhi.
6. Kumar, Sanjay & Pushp Lata, “Communication Skills”, Oxford University Press, New Delhi

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Hrs)	Marks Allotted (Out of 50)
1	12	12
2	12	12
3	04	6
4	03	3
5	12	15
6	02	2
Total	45	50

1.2 APPLIED MATHEMATICS - I

L	P
4	-

RATIONALE

Contents of this course provide fundamental base for understanding engineering problems and their solution algorithms. Contents of this course will enable students to use basic tools like binomial theorem, partial fractions, etc. for solving complex engineering problems with exact solutions in a way which involve less computational task. The analytical capabilities will enable the students to solve problems in engineering field.

LEARNING OUTCOMES

After undergoing this course, the students will be able to:

- Apply Complex Number and its representation for two dimensional designing and related calculations.
- Apply the basic concepts of permutation and combination to find out various ways or arrangements possible for a particular problem.
- Apply binomial theorem to find approximate value of certain expressions and extracting roots of certain expressions.
- Apply basics concepts of partial fractions to simplify the concept of rational expression.
- Solve engineering problems that are in matrix format by applying the basic understanding of matrices and their properties,
- Solve problems related to height, distance, elevation by making use of trigonometry.
- Write the equation of straight line and circle by using coordinate geometry.
- Optimize the utilization of resources by applying concepts of linear programming.

DETAILED CONTENTS

1. Algebra (20 hrs)
 - 1.1 Complex Numbers: Complex number, representation, modulus and amplitude.
 - 1.2 Partial fractions (linear factors, repeated linear factors, non-reducible quadratic factors excluding repeated factors).
 - 1.3 Meaning of ${}^n P_r$ & ${}^n C_r$ (mathematical expression). Binomial theorem (without proof) for positive integral index (expansion and general form); binomial theorem for any index (expansion without proof), first and second binomial approximation with applications to engineering problems.
 - 1.4 Introduction to Matrices and Determinants – Addition, subtraction and multiplication (upto 3×3 matrices), Determinants, simple properties, Crammer Rule.

2. Trigonometry (15 hrs)
 - 2.1 Introduction to T ratios, T-Ratios of Allied angles (without proof), Sum, Difference formulae and their applications (without proof). Product formulae (Transformation of product to sum, difference and vice versa). T-Ratios of multiple angles, sub-multiple angles ($2A, 3A, A/2$).
 - 2.2 Applications of Trigonometric terms in engineering problems such as to find an angle of elevation, height, distance etc.

3. Co-ordinate Geometry (18 hrs)
 - 3.1 Cartesian and Polar coordinates (two dimensional), conversion from Cartesian to Polar coordinates and vice-versa
 - 3.2 Slope of a line, equation of straight line in various standards forms (without proof); (slope intercept form, intercept form, one-point form, two-point form, symmetric form, normal form, general form), inter section of two straight lines, concurrency of lines, angle between straight lines.
 - 3.3 General equation of a circle and its characteristics. To find the equation of a circle, given:
 - * Centre and radius
 - * Three points lying on it
 - * Coordinates of end points of a diameter

4. Operations Research (7 hrs)
- 4.1 Linear Programming Problems formulations.
- 4.2 Graphical Method

INSTRUCTIONAL STATREGY

Basic of algebra, trigonometry, coordinate geometry, operations research can be taught in the light of their applications in the field of engineering and technology. By laying more emphasis on applied part, teacher can also help in providing a good continuing education base to the students.

RECOMMENDED BOOKS

1. Grewal, BS, "Elementary Engineering Mathematics", Khanna Publishers, New Delhi
2. Sabharwal, SS & Dr Sunita Jain, "Applied Mathematics, Vol. I & II", Eagle Parkashan, Jalandhar
3. Sastry, SS, "Engineering Mathematics, Vol I & II", Prentice Hall of India Pvt. Ltd.,
4. Pal, Srimanta and Subodh C. Bhunia, "Engineering Mathematics", Oxford University Press, New Delhi

SUGGESTED DISTRIBUTION OF MARKS

Topic	Time Allotted (Hrs)	Marks Allotted (Out of 60)
1.	20	20
2.	15	15
3.	18	18
4	7	7
Total	60	60

1.3 APPLIED PHYSICS – I

L	P
3	2

RATIONALE

Applied physics includes the study of a large number of diverse topics all related to things that go on in the world around us. It aims to give an understanding of this world both by observation and by prediction of the way in which objects will behave. Concrete use of physical principles and analysis in various fields of engineering and technology are given prominence in the course content.

Note: Teachers should give examples of engineering/technology applications of various concepts and principles in each topic so that students are able to appreciate learning of these concepts and principles. In all contents, SI units should be followed.

LEARNING OUTCOMES

After undergoing this subject, the student will be able to:

- Select units of various physical quantities for use in engineering solutions.
- Represent physical quantities as scalar and vector.
- Use the concepts of force and motion to solve problems.
- Solve problems related to friction, work, power and energy,
- Comprehend properties of matter.
- Comprehend modes of heat transfer.
- Make measurements with accuracy.

DETAILED CONTENTS

- | | | |
|-----|--|---------|
| 1. | Units and Dimensions | (9 hrs) |
| 1.1 | Physical quantities Units - fundamental and derived units, systems of units (FPS, CGS and SI units) | |
| 1.2 | Dimensions and dimensional formulae of physical quantities (area, volume, velocity, acceleration, momentum, force, impulse, work, power, energy, surface tension, stress, strain) | |
| 1.3 | Principle of homogeneity of dimensions | |
| 1.4 | Dimensional equations and their applications, conversion of units from one system to another for density, force, pressure, work, power, velocity and acceleration. Checking of dimensional equations | |
| 1.5 | Limitations of dimensional analysis | |

2. Force and Motion (10 hrs)
- 2.1 Scalar and vector quantities – examples, representation of vector, types of vectors
 - 2.2 Addition and Subtraction of Vectors, Triangle and Parallelogram law (Statement only), Scalar and Vector Product.
 - 2.3 Resolution of Vectors
 - 2.4 Force, Momentum, Statement of Conservation of linear momentum, its applications
 - 2.5 Impulse and its Applications
 - 2.6 Circular motion, definition of angular displacement, angular velocity, angular acceleration, frequency, time period.
 - 2.7 Relation between linear and angular velocity, linear acceleration and angular acceleration (Only Formula), Angular momentum and torque (definition only)
 - 2.8 Concept of centripetal and centrifugal forces and their applications with examples such as banking of roads
3. Work, Power and Energy (8 hrs)
- 3.1 Work: and its units, examples of zero work, positive work and negative work
 - 3.2 Friction: concept, types, laws of limiting friction
 - 3.3 Energy and its units: Kinetic energy and gravitational potential energy with examples and their derivation
 - 3.4 Principle of conservation of mechanical energy for freely falling bodies, examples of transformation of energy.
 - 3.5 Power and its units, calculation of power in numerical problems
4. Properties of Matter (9 hrs)
- 4.1 Elasticity: definition of stress and strain, Moduli of elasticity (Only definition, No derivation) , Hooke's law, significance of stress strain curve
 - 4.2 Pressure: definition, its units, atmospheric pressure, gauge pressure, absolute pressure
 - 4.3 Surface tension: concept, its units, angle of contact, applications of surface tension, effect of temperature on surface tension
 - 4.4 Viscosity and coefficient of viscosity: Terminal velocity, Stoke's law

5. Thermometry (9 hrs)
- 5.1 Difference between heat and temperature
 - 5.2 Modes of transfer of heat (Conduction, convection and radiation with examples)
 - 5.3 Different scales of temperature and their relationship
 - 5.4 Expansion of solids, liquids and gases, coefficient of linear, surface and cubical expansions and relation amongst them
 - 5.5 Concept of Co-efficient of thermal conductivity

LIST OF PRACTICALS (to perform minimum 8 experiments)

1. To find volume of solid sphere using a vernier caliper.
2. To find internal diameter and depth of a beaker using a vernier caliper and hence find its volume.
3. To find the diameter of wire using a screw gauge
4. To determine the thickness of glass strip using a spherometer
5. To verify parallelogram law of forces
6. To study conservation of energy of a ball or cylinder rolling down an inclined plane.
7. To determine the atmospheric pressure at a place using Fortin's Barometer
8. To determine the viscosity of glycerin by Stoke's method
9. To determine the coefficient of linear expansion of a metal rod
10. To determine force constant of spring using Hooks law

INSTRUCTIONAL STATREGY

Teacher may use various teaching aids like models, charts, graphs and experimental kits etc. for imparting effective instructions in the subject. The teacher should explain about field applications before teaching the basics. to develop proper understanding of the physical phenomenon. Use of demonstration can make the subject interesting and develop scientific temper in the students.

RECOMMENDED BOOKS

1. “Text Book of Physics for Class XI (Part-I, Part-II)”, N.C.E.R.T., Delhi
2. “Applied Physics, Vol. I and Vol. II”, TTTI Publications, Tata McGraw Hill, Delhi
3. Verma, HC, “Concepts in Physics Vol. I & II”, Bharti Bhawan Ltd. New Delhi
4. “Comprehensive Practical Physics, Vol, I & II”, JN Jaiswal, Laxmi Publications (P) Ltd., New Delhi
5. Naik, PV, “Engineering Physics”, Pearson Education Pvt. Ltd, New Delhi
6. Banwait, RA & R, Dogra, “Applied Physics I & II”, Eagle Parkashan, Jalandhar
7. Bhattacharya, DK & Poonam Tandan, “Engineering Physics”, Oxford University Press, New Delhi

SUGGESTED DISTRIBUTION OF MARKS

Topic	Time Allotted (Hrs)	Marks Allotted (Out of 50)
1.	9	10
2.	10	12
3.	8	8
4.	9	10
5.	9	10
Total	45	50

1.4 APPLIED CHEMISTRY

L P

3 2

RATIONALE

The use of various chemicals and chemical products in diverse technical and engineering fields have repeatedly proved the importance of Applied Chemistry, which enhances its role to a new peak. On the other hand, ever increasing use of such materials will compel engineers, technocrats to acquire essential applied chemistry knowledge in order to select engineering materials, which not only suit them but also provide more environmental compatibility. This situation demands principles of Applied Chemistry in diploma-engineering courses. Principles of Applied Chemistry will enable budding diploma holders to develop scientific temper and appreciate importance of chemistry. Hence the subject of Applied Chemistry.

LEARNING OUTCOMES

After undergoing this subject, the student will be able to:

- Interpret both qualitative and quantitative aspects of simple chemical substances.
- Substantiate the laws and principles on which structure of atom is established.
- Understand types of bonds in chemical substance and their influence on the properties of chemical substances.
- Prepare solution of required concentrations.
- Understand qualitatively and quantitatively pH and buffer solutions.
- Significance of pH and buffer solutions and their industrial applications (in the process such as electrolysis, electrochemical machining of materials etc).
- Explain cause and factors adversely affecting natural water quality and remedial measures available for water purification to achieve water quality standards required for domestic, agricultural and industrial applications.
- Appreciate and practice the water conservation techniques.
- Identify and classify the substance based on the electric behavior.
- Realize the laws/principles efficiently used in development of electrochemical cells towards the greener energy.
- Identify most efficient fuel for the engine and engineering applications.
- Understand the elementary idea of polymers and plastics
- Distinguish different type of plastics and their applications.

DETAILED CONTENTS

1. Basic Concept of Chemistry (2 hrs)
 - 1.1 Symbols of elements and valency, writing of chemical formulae of simple compounds.
 - 1.2 Calculation of molecular masses of CaCO_3 , NaCl , CuSO_4 , NaOH , Ca(OH)_2 , H_2SO_4 , $\text{C}_2\text{H}_2\text{O}_4$. (Atomic mass of elements should be provided)

2. Atomic Structure and Chemical Bonding (8 hrs)
 - 2.1 Bohr's model of atom (qualitative treatment only).
 - 2.2 Atomic number, atomic mass number isotopes and isobars.
 - 2.3 Definition of orbit and orbitals, shapes of s and p orbitals only, quantum numbers and their significance,
 - 2.4 Aufbau's principle, Pauli's exclusion principle and Hund's rule electronic configuration of elements with atomic number (Z) = 30 only. (Electronic configurations of elements with atomic number greater than 30 are excluded).
 - 2.5 Chemical bonding and cause of bonding and types of chemical bonding; Ionic bond (example NaCl) and Covalent bond (sigma (σ) and pi (π) bonds) with examples of H_2 , O_2 , N_2 and CH_4 Metallic bonding.

3. Solutions (05 hrs)
 - 3.1 Definition of solution, solute and solvent with examples
 - 3.2 Methods to express the concentration of solution- molarity (M) and molality (m), mass percentage, volume percentage and mole fraction and related simple numericals.
 - 3.3 Arrhenius concept of acids and bases. pH of solution, simple numericals on pH and industrial applications of pH.
 - 3.4 Definition of buffer solution and types of buffer solutions with examples and industrial applications of buffers solutions.

4. Water (10 hrs)
 - 4.1 Classification of water – soft water and hard water, action of soap on hard water, types of hardness, causes of hardness, units of hardness – mg per liter (mgL^{-1}) and part per million (ppm) and simple numericals.
 - 4.2 Disadvantages caused by the use of hard water in domestic industry and boiler feed water.
 - 4.3 Removal of hardness -Permutit process and Ion-exchange process.
 - 4.4 Drinking water and characteristics of drinking water.
 - 4.5 Natural water sterilization by chlorine and UV radiation and reverse osmosis (elementary idea).

5. Electro Chemistry (6 hrs)
- 5.1 Electronic concept of oxidation, reduction and redox reactions
 - 5.2 Definition of terms: electrolytes, non-electrolytes with suitable examples
 - 5.3 Faradays laws of electrolysis and simple numerical problems.
 - 5.4 Industrial Application of Electrolysis – Electroplating.
 - 5.5 Application of redox reactions in electrochemical cells (qualitative idea only excluding reactions) - commercial dry cell (Primary) and elementary idea of secondary cell (Only lead storage battery)
6. Chemistry of Fuels and Lubricants (12 hrs)
- 6.1. Definition of fuel, classification of fuels (primary and secondary), characteristics of good fuel.
 - 6.2 Calorific value-higher calorific value, lower calorific value, determination of calorific value of solid or liquid fuel using Bomb calorimeter and numerical examples.
 - 6.3 Coal - proximate analysis of coal
 - 6.4 Fuel rating – Octane number and Cetane number, fuel-structural influence on Octane and Cetane numbers
 - 6.5 Gaseous fuels – chemical composition, calorific value and applications of natural gas (CNG), LPG, producer gas, water gas and biogas. (preparation/manufacture excluded)
 - 6.6 Definition of Lubricant and characteristics of good lubricant
 - 6.7 Classification of lubricants –liquid lubricants, solid lubricants, semi-solid lubricants with examples
 - 6.8 Properties of lubricant: Physical properties –viscosity and viscosity index, cloud point and pour point, flash point and fire point, oiliness. Chemical properties- Total Acid Value or Number (TAV or TAN), carbon residue, saponification value.
7. Polymers and Plastics (02 hrs)
- 7.1 Definition of polymer, monomer and degree of polymerization
 - 7.2 Brief introduction of plastics - thermo plastics and thermo setting plastics with suitable examples (PVC, PS, PTFE, Nylon 6, Nylon 66, bakelite) distinction between thermo and thermo setting plastics
 - 7.3 Applications of polymers in industry and daily life
 - 7.4 Introduction to nano materials and nano technology

LIST OF PRACTICALS

1. Preparation of standard solution of oxalic acid.
2. To determine strength of given sodium hydroxide solution by titrating against standard oxalic acid solution using phenolphthalein indicator.

3. To determine TDS in given sample of water.
4. To prepare Mohr's salt from ferrous sulfate and ammonium sulfate.
5. Determination of pH of given solution using pH meter.
6. Estimation of total alkalinity of given water sample by titrating it against standard sulfuric acid solution.
7. Gravimetric estimation of moisture in the given coal sample (proximate analysis).
8. Gravimetric estimation of ash content in the given coal sample (proximate analysis).
9. Determination of viscosity of given liquid using Redwood viscometers
10. To construct simple Daniel cell and measure its e.m.f. using voltmeter.
11. To estimate hardness of water using EDTA method.

INSTRUCTIONAL STRATEGY

Teachers may take help of various models and charts while imparting instructions to make the concept clear. More emphasis should be laid on discussing and explaining practical applications of various chemical process and reactions. In addition, students should be encouraged or motivated to study those processes in more details, which may find practical application in their future professional career.

RECOMMENDED BOOKS

1. Kuricose, J.C. and J. Rajaram, "Chemistry in Engineering", Tata McGraw Hill, Publishing Company Limited, New Delhi.
2. Jain, P.C. & Monika Jain, "Engineering Chemistry", Dhanapat Rai Publishing Company, New Delhi.
3. Ahuja, S. C. and G. H. Hugar, "Eagle's Applied Chemistry (I and II)", Eagle Prakashan, Jalandhar.
4. Rao, C N R, "Understanding Chemistry", Universities Press (India) Pvt Ltd., 2011
5. Chopra, H. K. & A. Parmar, "Engineering Chemistry – A Text Book", Narosa Publishing House, New Delhi.
6. Pandey, Dr. Himanshu, "Engineering Chemistry", Goel Publishing House, Meerut, India.

SUGGESTED DISTRIBUTION OF MARKS

Topics	Time Allotted (hrs)	Marks Allotted (Out of 50)
1.	02	03
2.	08	08
3.	05	06
4.	10	12
5.	06	06
6.	12	12
7.	02	03
Total	45	50

1.5 BASICS OF INFORMATION TECHNOLOGY

L	P
-	2

RATIONALE

Information technology has great influence on all aspects of life. Almost all work places and living environment are being computerized. The subject introduces the fundamentals of computer system for using various hardware and software components. In order to prepare diploma holders to work in these environments, it is essential that they are exposed to various aspects of information technology such as understanding the concept of information technology and its scope; operating a computer; use of various office automation tools using MS Office/Open Office/Libre Office, and internet concepts. This exposure will enable the students to enter their professions with confidence.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- Identify computer hardware components, network components and peripherals.
- Install application and utility software.
- Use word processing software to prepare document.
- Use spreadsheet software to create workbook and automate calculation.
- Use presentation software to create interactive presentation.
- Browse information on the Web.

Note: Explanation of Introductory part should be demonstrated with practical work. Following topics may be explained in the laboratory along with the practical exercises. There will not be any theory examination.

TOPICS TO BE EXPLAINED THROUGH DEMONSTRATION

1. Basic Concepts of IT and Its Application

Information Technology concept and scope, applications of IT.

2. Computer Hardware:

Block diagram of a computer, components of computer system, CPU, Memory, Input devices; keyboard, Scanner, mouse etc; Output devices; VDU, LCD, Printers etc. Primary and Secondary Memory: RAM, ROM, tracks and sectors, optical disk (CD , DVD & Blue Ray Disk.), USB/Flash Drive, HDD, SSD

3. Software Concepts and Programming:

System software, Application software, Virtualization software and Utility software, Introduction of Operating System, Installation of Application software, Features of OPEN OFFICE/MS OFFICE(MS word, Excel, PowerPoint).
Flow chart using algorithm development, Input Output statement, Control structures

4. Internet Concepts:

Basics of Networking – LAN, WAN, PAN, MAN, and sharing of printers and other resources, Concept of IP addresses, introduction of internet, applications of internet like: e-mail and browsing, concept of search engine and safe searching. Various browsers like Internet explorer/Microsoft Edge, Mozilla Firefox, WWW (World Wide Web), hyperlinks, introduction to Anti-virus.

LIST OF PRACTICAL EXERCISES

1. Given a PC, identify its basic hardware components, network components and peripherals. List their functions .
2. Installation of various application software and utility software.
3. Installation of I/O devices like scanner, printer and plotter.
4. Practice on various features/functions of Windows Operating System..

Word Processing (MS Word/Open Office Writer/Libre Office Writer)

5. Creating/opening, saving and printing a document
6. Editing and formatting a document
7. Setting paragraph and page margins.
8. Adding header, footer and page numbering
9. Creating, inserting and formatting a table.
10. Spell checker, inserting date, time, special symbols, importing graphic images, drawing tools.

Spread Sheet Processing (MS Excel/Open Office Calc/Libre Office Calc)

11. Creating/opening, saving and printing a worksheet.
12. Editing and formatting of worksheets including changing colour, size, font, alignment of text and cell formatting.
13. Using statistical functions like sum, avg, min, max, if, count and countif, lookup.
14. Creating and formatting a chart, Using charts to analyse data. Use of filters.

Presentation Software (MS Power Point/Open Office Impress/Libre Office Impress)

15. Creating, saving, opening and printing a presentation.
16. Different views of a slide.
17. Using slide layout and template.
18. Editing and formatting slides by adding titles, subtitles, text, background, watermark, table, charts, images and sound.
19. Viewing the slide show with slide transition, animation effect, timing and order.

Programming

20. Printing of name 100 times using loop statement.

Internet and its Applications

21. Creating an e mail account. Sending and receiving e-mail.
22. Browsing and down loading of information from internet.
23. Surfing different websites like institute website, State Board PSBTE website, DTE website, NITTTR, Chandigarh website, AICTE website, various search engines like google, bing etc.

INSTRUCTIONAL STRATEGY

Since this subject is practice oriented, the teacher should demonstrate the capabilities of computers to students while doing practical exercises. The students should be made familiar with computer parts, peripherals, connections and proficient in making use of MS Office/Open Office in addition to working on internet. The student should be made capable of working on computers independently.

RECOMMENDED BOOKS

1. Arora, Vipin, "Computer Fundamentals and Information Technology", Eagle Parkashan, Jalandhar
2. Sinha, PK, "Computer Fundamentals", BPB Publication, New Delhi
3. Rajaraman V, "Fundamentals of Computer", Prentice Hall of India Pvt. Ltd., New Delhi
4. Saxena, Sanjay, "MS Office for Everyone", Vikas Publishing House Pvt. Ltd., Jungpura, New Delhi
5. Leon and Leon, "Fundamentals of Information Technology", Vikas Publishing House Pvt. Ltd., Jungpura, New Delhi

1.6 ENGINEERING DRAWING - I

L P
- 6

RATIONALE

Drawing is the language of engineers and technicians. Reading and interpreting engineering drawing is their day to day responsibility. The subject is aimed at developing basic graphic skills in the students so as to enable them to use these skills in preparation of engineering drawings, their reading and interpretation. The emphasis, while imparting instructions, should be to develop conceptual skills in the students following BIS SP 46 – 1988.

Note:

- i) First angle projection is to be followed.
- ii) Minimum of 16 sheets to be prepared and at least 3 sheets on AutoCAD.
- iii) Instructions relevant to various drawings may be given along with appropriate demonstrations, before assigning drawing practice to students.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- Identify and use of different grades of pencils and other drafting instruments which are used in engineering field
- Draw free hand sketches of various kinds of objects.
- Utilize various types of lines used in engineering drawing.
- Read and apply different dimensioning methods on drawing of objects.
- Use different types of scales and their utilization in reading and reproducing drawings of objects and maps.
- Draw 2 - dimensional view of different objects viewed from different angles (orthographic views)
- Draw and interpret complete inner hidden details of an object which are otherwise not visible in normal view
- Generate isometric (3D) drawing from different 2D (orthographic) views/sketches
- Identify conventions for different engineering materials, symbols, sections of regular objects and general fittings used in Civil and Electrical household appliances
- Use basic commands of AutoCAD.

DETAILED CONTENTS-CUM- PRACTICAL EXERCISES

1. Introduction to Engineering Drawing (03 sheets)
 - 1.1 Introduction to drawing instruments, materials, layout and sizes of drawing sheets and drawing boards.
 - 1.2 Different types of lines in Engineering drawing as per BIS specifications
 - 1.3 Practice of vertical, horizontal and inclined lines, geometrical figures such as triangles, rectangles, circles, ellipses and curves, hexagonal, pentagon with the help of drawing instruments.
 - 1.4 Free hand and instrumental lettering (Alphabet and numerals) – upper case (Capital Letter), single stroke, vertical and inclined at 75 degree, series of 5,8,12 mm of free hand and instrumental lettering of height 25 to 35 mm in the ratio of 7:4

2. Dimensioning Technique (01 sheet)
 - 2.1 Necessity of dimensioning, method and principles of dimensioning (mainly theoretical instructions)
 - 2.2 Dimensioning of overall sizes, circles, threaded holes, chamfered surfaces, angles, tapered surfaces, holes, equally spaced on P.C.D., counter sunk holes, counter bored holes, cylindrical parts, narrow spaces and gaps, radii, curves and arches

3. Scales (02 sheets)
 - 3.1 Scales –their needs and importance (theoretical instructions), type of scales, definition of R.F. and length of scale
 - 3.2 Drawing of plain and diagonal scales

4. Orthographic Projections (06 sheets)
 - 4.1 Theory of orthographic projections (Elaborate theoretical instructions)
 - 4.2 Projection of Points in different quadrant
 - 4.3 Projection of Straight Line (1st and 3rd angle)
 - 4.3.1. Line parallel to both the planes
 - 4.3.2. Line perpendicular to any one of the reference plane
 - 4.3.3. Line inclined to any one of the reference plane.

- 4.4 Projection of Plane – Different lamina like square, rectangular, triangular and circle inclined to one plane, parallel and perpendicular to another plane in 1st angle only
- 4.5 Three views of orthographic projection of different objects. (At least one sheet in 3rd angle)
- 4.6 Identification of surfaces
5. Sections (02 sheets)
- 5.1 Importance and salient features
- 5.2 Drawing of full section, half section, partial or broken out sections, Offset sections, revolved sections and removed sections.
- 5.3 Convention sectional representation of various materials, conventional breaks for shafts, pipes, rectangular, square, angle, channel, rolled sections
- 5.4 Orthographic sectional views of different objects.
6. Isometric Views (02 sheets)
- 6.1 Fundamentals of isometric projections and isometric scale.
- 6.2 Isometric views of combination of regular solids like cylinder, cone, cube and prism.
7. Common Symbols and Conventions used in Engineering (02 sheets)
- 7.1 Civil Engineering sanitary fitting symbols
- 7.2 Electrical fitting symbols for domestic interior installations
- *8. Introduction to Computer Aided Drafting (03 sheets)
- Basic introduction and operational instructions of various commands in Computer Aided Drafting. At least three 2 D drawings using Computer Aided Drafting of cube, cuboid, cone, pyramid, truncated cone and pyramid, sphere and combination of above solids.
- * **Computer aided drawing will be evaluated internally by sessional marks and not by final theory paper.**

INSTRUCTIONAL STRATEGY

Teacher should show model of realia of the component/part whose drawing is to be made. Emphasis should be given on cleanliness, dimensioning and layout of sheet. Focus should be on proper selection of drawing instruments and their proper use. The institute should procure AutoCAD or other engineering graphics software for practice in engineering drawings. Teachers should undergo training in AutoCAD/Engineering Graphic. Separate labs for practice on AutoCAD should be established.

RECOMMENDED BOOKS

1. Singh, Surjit, "A Text Book of Engineering Drawing", Dhanpat Rai & Co., Delhi
2. Gill, PS, "Engineering Drawing", SK Kataria & Sons, New Delhi
3. Bhatt, ND, "Elementary Engineering Drawing in First Angle Projection", Charotar Publishing House Pvt. Ltd., Anand
4. Layall, JS, "Engineering Drawing I & II", Eagle Parkashan, Jalandhar
5. Goel, DK, "Engineering Drawing I", GBD Publication.

1.7 GENERAL WORKSHOP PRACTICE – I

L P
- 6

RATIONALE

In order to have a balanced overall development of diploma engineers, it is necessary to integrate theory with practical. General workshop practical included in the curriculum in order to provide hands-on practical knowledge of different tools and basic manufacturing processes. Basic knowledge of workshop technology and practical in various workshops develop the attitude of team working, safety awareness and development of right attitude. This subject provides miniature industrial environment in the educational institute.

LEARNING OUTCOMES

After completing the course the students will be able to:

- Identify shop wise tools and equipment, their types, specifications and use with proficiency.
- Identify different types of materials, their uses and to maintain tools, equipment etc.
- Use and take measurements with the help of basic measuring tools/instrument.
- Select proper tools for a particular operation and use hand tools in different workshops with predefined outcome.
- Select materials, tools, and sequence of operations to make a job as per given specification/drawing.
- Prepare simple jobs independently and inspect the same according to drawing.
- Operate various tools and equipment in different workshops with predefined outcome, performance, standards.
- Follow the safety procedures and precautionary measures in different workshop with zero accidents.

DETAILED CONTENTS-CUM- PRACTICAL EXERCISES

Note: The students are supposed to come in proper workshop uniform prescribed by the institute. Wearing shoes in the workshop(s) is compulsory. Importance of safety and cleanliness, safety measures and upkeep of tools, equipment and environment in each of the following workshops will be explained for conduct of practical. The students should prepare sketches of various tools/jobs sequence of operations etc. in their practical notebook.

The following shops are included in the syllabus:

1. Welding Shop – I
2. Fitting Shop – I
3. Sheet Metal Shop – I
4. Electric Shop-I
5. Carpentry Shop – I
6. Smithy Shop – I or Additive Manufacturing Shop- I

1. WELDING SHOP – I

- a. Safety precautions of concerned shop and use of Personal Protective Equipment (PPE). Introduction and importance of welding as compared to other material joining processes. Classification of welding processes. Specifications and type of welding machines, welding parameters, welding methods, welding joints and welding positions. Classification and coding of electrodes and functions of electrode coating ingredients.
 - b. Demonstration of hand tools, arc welding machines, equipment and materials to be welded.
- 1.3 Jobs to be prepared:
- | | |
|---------|--|
| Job I | Practice of striking arc (Minimum 4 beads on 100 mm long M.S. flat) and Practice of depositing beads at different current levels. (Minimum 4 beads on M.S. flat at four different setting of current level). |
| Job II | Making a lap joint using arc welding (SMAW) on MS Flat. |
| Job III | Making a butt joint using arc welding (SMAW) on MS Flat. (100 mm long). |
| Job IV | Making a T shape Joint using arc welding (SMAW) on M.S. Flat (100mm x 6 mm). |

2. FITTING SHOP – I

- 2.1 Safety precautions of concerned shop and use of Personal Protective Equipment (PPE). Introduction, functions, classification, specification and use of various types of holding, cutting, marking and measuring tools used in fitting shop like-Bench vice, V block, C clamp, Ball peen hammer, scriber, punches, files, hacksaw, surface plate, try square, calipers, steel rule, Vernier calliper, Micrometre and Vernier height gauge etc. Identification of materials like-Iron, Copper, Stainless Steel, Aluminium etc.), Identification of various steel sections like-flat, angle, channel, bar etc.). Introduction to various fitting shop operations/processes (Hacksawing, Drilling, Chipping and Filing).

2.2 Demonstration of various types of holding, cutting, marking and measuring tools used in fitting shop.

2.3 Jobs to be prepared:

Job I To make a rectangular job by performing the operations: Sawing, Marking, filing on MS work piece (75 x 50 x 6 mm) by making sides at 90 degree and surface flatness at 180 degrees and to maintain dimensions within an accuracy of ± 0.25 mm.

Job II To make a job by performing the operations: Sawing, Marking, corner circular/radius filing on MS work piece (75 x 50 x 6 mm) by measuring dimensions with the help of Vernier Calipers within the tolerance of ± 0.1 mm.

Job III To Make 'V' type cut-out profile from a square piece of MS flat using hand hacksaw, filing, marking and measuring operations.

3. SHEET METAL SHOP – I

3.1. Safety precautions of concerned shop and use of Personal Protective Equipment (PPE). Introduction and functions of various types of tools used in sheet metal shop: - snips, hand shearing, measuring tools, marking tools, striking tools and bending tools including types of stakes. Introduction and importance to different types of joints and fasteners used in sheet metal work. Introduction and purpose of different metals used in sheet-metal work-black iron, galvanized iron, aluminium and stainless steel. Introduction of different types of Rivets, types of riveted joints, advantages, disadvantages and applications.

3.2 Demonstration of various types of holding, cutting, marking and bending tools used in fitting shop. demonstration of various raw materials used in sheet metal shop e.g. black-iron sheet, galvanized-iron plain sheet, galvanised corrugated sheet, aluminium sheet etc.

3.3 Jobs to be prepared:

Job I Shearing and bending practice on a sheet using hand shears/snips and stakes.

Job II To fabricate different types of sheet metal joint such as lap joint-single seam/double seam.

Job III To fabricate riveted lap joint (chain or zig zag type).

Job IV To fabricate single cover plate chain type, zig-zag type and single rivetted butt Joint.

4. ELECTRIC SHOP - I

4.1 Safety precautions of concerned shop and use of Personal Protective Equipment (PPE). Introduction, functions and specifications of different

types of tools, wires, cables, switches, fuses, cleats, clamps, allied items, and accessories used in Electric shop. Introduction to battery charger and its functioning. Introduction to common electrical appliances such as auto electric iron, electric kettle, ceiling/table fan, desert cooler etc. Introduction to lead acid battery and nickel cadmium battery.

4.2 Demonstration and identification of common electrical materials with standard ratings and specifications such as wires, cables, switches, fuses, cleats, clamps and allied items, tools and accessories. Demonstration of common electrical appliances such as auto electric iron, electric kettle, ceiling/table fan, desert cooler etc. Demonstration of lead acid battery and nickel cadmium battery.

4.3 Job Practice:

Job I Identification of phase, neutral, earth wires for connection to domestic electrical appliances and their connections to three pin plugs.

Job II Practice in making series and parallel circuit. Make one lamp control by one switch circuit.

Job III Practice on house wiring circuits using fuse, switches, sockets, ceiling rose etc. in batten or P.V.C. casing-caping, conduit and concealed wiring.

Job IV Installation of battery and connecting two or three batteries in series and parallel.

Job V Charging a battery and testing with hydrometer and cell tester

5. CARPENTRY SHOP – I

5.1 Safety precautions of concerned shop and use of Personal Protective Equipment (PPE). Introduction to wood, timber their properties, uses & defects and their joints. Seasoning of wood and its advantages. Introduction, specifications and function of various types of tools used in carpentry (such as different types of Saws, C-Clamp, Chisels, Carpenter's vice, Mallets, Marking gauges, Scriber, Try-square, Steel tape, Wooden plane, Metallic Jack plane, Rulers) by segregating as cutting tools, supporting tools, holding tools, measuring tools etc. Types of wooden joints. Techniques/method of sharpening of jack plane cutter/blade.

5.2 Demonstration of wood/timber, seasoning, various types of tools used in carpentry shop. Types of wooden joints.

5.3 Jobs to be Prepared :

Job I To make a rectangular wooden piece involving operations like-planing, marking, sawing and measuring.

Job II Iron jack plane blade/cutter sharpening and Chisel sharpening practice.

Job III To make a Half Lap Joint (cross, L or T shape – any one)

Job IV To make a Mortise and Tenon joint (T- shape Joint)

6. SMITHY SHOP – I

6.1 Safety precautions of concerned shop and use of Personal Protective Equipment (PPE). Introduction to Smithy shop, different types of Hearths, its purpose, specifications, uses, types of various tools and equipment used in hand forging by segregating as cutting tools, supporting tools, holding tools, measuring tools etc. Types of fuel used and maximum temperature obtained, types of raw materials used in Smithy Shop , uses of Fire Bricks and Clays in Forging workshop.

6.3 Demonstration of different fuels used and maximum temperature obtained. Use of fire brick and clay in forging/ smithy shop. Practice of firing of hearth/Furnace, Temperature Control of Fire. Demonstration of different basic Smithy/Forging operations such as Cutting, Upsetting, Drawing down, Setting down, Necking, Bending, Fullering, Swaging, Punching and Drifting. Demonstration of Simple Heat treatment processes like Tempering, Normalizing Hardening etc

6.3 Jobs to be prepared:

Job I Making a job of square shape from a M.S. rod by forging method.

Job II Making a square shape L hook from M.S. rod.

Job III Making a ring from MS rod by cold or hot forging process

Job IV Making a job using drawing down operation on round or flat section.

6. ADDITIVE MANUFACTURING SHOP - I

6.1 Safety precautions of concerned shop and use of Personal Protective Equipment (PPE). Introduction to digital design, Computer Aided Drafting (2D drawing) and Computer Aided Design (3D modelling), various CAD packages, basic 2D and 3D commands, basic geometrical shapes (both regular and irregular) etc. Introduction to Additive Manufacturing, identification of different types of materials used, applications and advantages. Identification of different types of geometrical shapes: regular shapes like sphere, prisms, pyramids, solids of revolution, irregular shapes like I section, L section, C section and T section etc.

6.2 Demonstration of 3D CAD package including software interphase, basic commands for drawing, editing, modelling etc., fabrication of 3D models, saving in .PRT file, conversion to .STL file, error identification and its rectification, working of 3D printer, 3D printing of simple components.

6.3 Jobs to be performed

Job I: 3D modelling of basic right regular geometrical shapes:

Prisms: Triangular, square. Rectangular, pentagonal and hexagonal

Pyramids: Triangular, square. Rectangular, pentagonal and hexagonal

Job II: 3D modelling of solids of revolution: Sphere, cylinder, cone and torus

Job III: 3D modelling of special shapes like I section, L section, C section and T section

Job IV: 3D modelling of machined parts using various 3D commands.

Note :

1. Workshop instructors will guide and help the students throughout the practical class in order to explain and complete the job according to syllabus and for providing necessary facilities to the students during performance of practical by observing the safety precautions
2. The Workshop Superintendent or Foreman Instructor or Foreman will demonstrate and deliver the theoretical instructions with regard to introduction, functions, classification and specification of tools, instruments, equipment, apparatus etc. of all the topics covered in the syllabus.
3. The Workshop Superintendent or Foreman Instructor will also conduct the mid-term test and final practical exam of this subject.

RECOMMENDED BOOKS

1. Singh, Swaran, “Workshop Practice”, S. K. Kataria and Sons, New Delhi.
2. Bawa, H.S., “Workshop Practice”, Tata McGraw Hill Publishers, New Delhi.
3. Hajra, SK, “Workshop Technology I, II, III”, Choudhary and AK Choudhary Media Promoters and Publishers Pvt. Ltd. Mumbai.
4. Manchanda, “Workshop Technology Vol. I, II, III”, India Publishing House, Jalandhar.
5. Raghuwanshi, B.S., “Workshop Technology”, Dhanpat Rai and Co., New Delhi

TRAFFIC AWARENESS & ROAD SAFETY CAMP (I)

A diploma holder must have knowledge of various types of traffic rules and regulations. Road safety education is vital for people of all ages. As a responsible citizen, you should be aware of each and every road safety rules. Observation is the key skill you need in ensuring road safety. By obeying safety rules and regulations, you can save yourself and others on the road. This camp covers the basic concepts of traffic rules and safety. Lectures will be delivered on following broad topics with the coordination of Distt. Traffic police. There will be no exam for this camp.

1. Road safety Scenario
2. School bus and traffic management
3. Awareness of Traffic Signs
4. Speeding Limit
5. Always Wear your Shields
6. Overtaking
7. Awareness through Hoardings
8. Walking & Safe cycling

2.1 ENGLISH AND COMMUNICATION SKILLS - II

L	P
3	2

RATIONALE

Communication skills play an important role in career development. This subject aims at introducing basic concepts of communication besides laying emphasis on developing listening, speaking, reading and writing skills.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- Make proper oral presentations.
- Speak confidently.
- Debate properly.
- Write accurate official/business letters.
- Respond to telephone calls effectively.
- Overcome communication barriers.

DETAILED CONTENTS

1. Functional Grammar and Vocabulary (12 hrs)

Theory and Practical exercises on following:

 - 1.1 One word substitution
 - 1.2 Functional Grammar and Vocabulary
 - 1.3 Prefixes and Suffixes
 - 1.4 Punctuation
 - 1.5 Narration
 - 1.6 Idioms and Phrases

2. Reading (9 hrs)

Comprehension, Vocabulary enrichment and grammar exercises based on the following readings:

Section-I

 - The Last Leaf - O' Henry
 - Sparrows - K A Abbas
 - The Postmaster - Rabindra Nath Tagore

Section-II

 - Night of the Scorpion - Nissim Ezekiel
 - All the World is a Stage - William Shakespeare

- Success – Emily Dickenson
- Daffodils – William Wordsworth

3. Writing (24 hrs)
- 3.1 Writing Resume and Cover letter
 - 3.2 Correspondence: Business and Official
 - 3.3 Report Writing – Introduction and features of good report.
 - 3.4 Press Release
 - 3.5 Memos and Circulars
 - 3.6 Notices (lost, found, and auction)
 - 3.7 Agenda and Minutes of Meetings
 - 3.8 Filling-up different forms such as bank form and on-line form for placement etc.
 - 3.9 Precis Writing
 - 3.10 E mail writing

LIST OF PRACTICALS

1. Group discussion on some current topic of interest.
2. Small speech using voice modulation.
3. Debate
4. Manners and Etiquette
5. Power point presentation
6. Telephonic conversation: General etiquette for making and receiving calls.
7. Mock interviews

INSTRUCTIONAL STRATEGY

Open source software should be used to help the students in developing listening skills. Student centred activities such as group discussions, role play should be used to ensure active participation of students in the classroom.

RECOMMENDED BOOKS

1. Revathi, Srinivas, “Communicating Effectively in English, Book-I”, Abhishek Publications, Chandigarh.
2. Mohan, Krishna & Meera Banerji, “Developing Communication Skills (2nd Edition)”, Published by Macmillan Publishers India Ltd; New Delhi.
3. Eastwood, John, “Oxford Practice Grammar”, Oxford University Press, London
4. Chadha, R. K., “Communication Techniques and Skills”, Dhanpat Rai Publications, New Delhi.
5. Wren & Martin, “High School English Grammar and Composition”, S. Chand & Company Ltd., Delhi.
6. Kumar, Sanjay & Pushp Lata, “Communication Skills”, Oxford University Press, New Delhi

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Hrs)	Marks Allotted (Out of 50)
1	12	12
2	9	12
3	24	26
Total	45	50

2.2 APPLIED MATHEMATICS – II

L P
3 -

RATIONALE

Applied mathematics forms the backbone of engineering students. Basic elements of differential calculus, integral calculus and differential equations have been included in this course. This will develop analytical abilities to apply in engineering field and will provide continuing educational base to the students.

LEARNING OUTCOMES

After undergoing the subject, students will be able to:

- Apply differential calculus to solve max/min and related rate measure problems.
- Apply concepts of definite integrals to calculate the area of a curve bounded by axes.
- Evaluate complex integrals in a simpler way by applying definite integral.
- Solve engineering problems by making use of ordinary differential equations.

DETAILED CONTENTS

1. Differential Calculus (18 hrs)
 - 1.1 Definition of function; Introduction to limit and continuity (definition only).
 - 1.2 Standard differentiation of algebraic, trigonometric, inverse trigonometric functions, logarithmic function and exponential function.
 - 1.3 Differentiation of sum, product and quotient of functions, Differentiation of function of a function, differentiation of implicit functions and parametric functions.
 - 1.4 Logarithmic differentiation and successive differentiation (excluding nth order).
 - 1.5 Application of differential calculus in:
 - (a) Rate Measures
 - (b) Maxima and minima (single variable functions) using second order derivative only
 - (c) Equation of tangent and normal to a curve (for explicit functions only)

2. Integral Calculus (22 hrs)
- 2.1 Indefinite integrals, Integration as inverse operation of differentiation with simple examples.
- 2.2 Standard integrals and related simple problems
- 2.3 Simple integration by substitution, by parts and by partial fractions (for linear factors only)
- 2.4 Evaluation of definite integrals (simple problems)
 Evaluation of $\int_0^{\pi/2} \sin^n x \cdot dx$, $\int_0^{\pi/2} \cos^n x \cdot dx$, $\int_0^{\pi/2} \sin^m x \cos^n x \cdot dx$
 using formulae without proof (m and n being positive integers only).
- 2.5 Applications of integration for evaluation of area bounded by a curve and axes (Simple problems).
3. Differential Equations (5 hrs)
- 3.1 Definition, order, degree of ordinary differential equations.
- 3.2 Formation of differential equation (up to 2nd order). Solution of Differential equations with Variable separation and Linear Differential equations.

INSTRUCTIONAL STRATEGY

Basic elements of Differential Calculus, Integral Calculus, and Differential Equations can be taught in the light of their applications in the field of engineering and technology. By laying more stress on applied part, teachers can also help in providing continuing education base to the students.

RECOMMENDED BOOKS

1. Grewal, BS, "Elementary Engineering Mathematics", Khanna Publishers, New Delhi
2. Engineering Mathematics by Vol. I & II by S Kohli, IPH, Jalandhar
3. Sabharwal, SS & Dr Sunita Jain, "Applied Mathematics, Vol. I & II", Eagle Parkashan, Jalandhar
4. Engineering Mathematics, Vol I, II & III by V Sundaram et al, Vikas Publishing House (P) Ltd., New Delhi
5. Sastry, SS, "Engineering Mathematics, Vol I & II", Prentice Hall of India Pvt. Ltd.,
6. Pal, Srimanta and Subodh C. Bhunia, "Engineering Mathematics", Oxford University Press, New Delhi

SUGGESTED DISTRIBUTION OF MARKS

Topic	Time Allotted (Hrs)	Marks Allotted (Out of 60)
1	18	24
2	22	30
3	5	6
Total	45	60

2.3 APPLIED PHYSICS – II

L	P
2	2

RATIONALE

Applied physics includes the study of a large number of diverse topics related to things that go in the world around us. It aims to give an understanding of this world both by observation and prediction of the way in which objects behave. Concrete use of physical principles and analysis in various fields of engineering and technology

LEARNING OUTCOMES

After undergoing this subject, the student will be able to;

- Apply the concept of wave motion
- Illustrate laws of reflection and refraction of light.
- Comprehend the phenomenon related to electrostatics
- Comprehend the terms and laws related to electricity and magnetism.
- Make use of laser for engineering applications.

DETAILED CONTENTS

1. Wave motion and its Applications (6 hrs)
 - 1.1 Wave motion, transverse and longitudinal wave motion with examples, sound and light waves, relationship among wave velocity, frequency and wave length and its application
 - 1.2 Free, forced and resonant vibrations with examples
 - 1.3 Acoustics of buildings – reverberation, reverberation time, echo, noise, coefficient of absorption of sound, methods to control reverberation time and their applications
 - 1.4 Ultrasonics – Introduction and applications.

2. Optics (6 hrs)
 - 2.1 Laws of reflection and refraction, refractive index, lens formula for thin lenses, power of lens, magnification
 - 2.2 Total internal reflection and its applications, Critical angle and conditions for total internal reflection
 - 2.3 Simple and compound microscope, astronomical telescope in normal adjustment, magnifying power (Only formula).

3. Electrostatics (6 hrs)
 - 3.1 Coulombs law, unit of charge,
 - 3.2 Electric field, Electric lines of force and their properties, Electric flux, Electric potential and potential difference

- 3.3 Capacitor and its working principle, Capacitance and its units. Capacitance of parallel plate capacitor (No derivation), Series and parallel combination of capacitors (numericals)
- 3.4 Dielectric and its effect on capacitance, dielectric break down
4. Electricity and Magnetism (9 hrs)
- 4.1 Electric Current and its Unit, Direct and alternating current,
- 4.2 Resistance and its Units, Specific Resistance, Conductance, Specific Conductance, Series and Parallel combination of Resistances. Factors affecting Resistance, Superconductivity (concept only)
- 4.3 Ohm's law and its verification
- 4.4 Kirchoff's laws, Wheatstone bridge principle
- 4.5 Heating effect of current, Electric power, Electric energy and its units (related numerical problems)
- 4.6 Introduction to magnetism, Types of magnetic materials. Dia, para and ferromagnetic materials with their properties,
- 4.7 Magnetic field and its units, magnetic lines of force, magnetic flux and their units
- 4.8 Concept of electromagnetic induction, Faraday's Laws and Lenz's law, Galvanometer and its use.
5. Modern Physics (3 hrs)
- 5.1 Lasers: its characteristics, spontaneous and stimulated emission, population inversion; Principle, construction and working of Ruby laser, engineering applications of lasers.

LIST OF PRACTICALS (To perform minimum 8 experiments)

1. To find the time period of a simple pendulum
2. To determine and verify the time period of cantilever
3. To verify laws of reflection from a plane mirror.
4. To find the focal length of convex lens by parallax method.
5. To determine the magnifying power of an astronomical telescope
6. To verify ohm's laws by drawing a graph between voltage and current.
7. To verify laws of resistances in series and parallel combination.
8. To find resistance of galvanometer by half deflection method
9. To measure very low resistance and very high resistances using Slide Wire bridge
10. Use of CRO in plotting AC and DC waveforms.
11. To find wave length of the laser beam.

INSTRUCTIONAL STRATEGY

Teacher may use various instructional media like models, charts and graphs while imparting instructions. The field application should be made clear before teaching the basics to develop proper understanding of the physical phenomenon. Use of demonstration can make the subject interesting and develop scientific temper in the students.

RECOMMENDED BOOKS

1. Text Book of Physics (Part-I, Part-II); N.C.E.R.T., Delhi
2. Concepts in Physics by HC Verma, Vol. I & II, Bharti Bhawan Ltd. New Delhi
3. Practical Physics by C. L. Arora, S Chand Publications
4. Engineering Physics by PV Naik, Pearson Education Pvt. Ltd, New Delhi

SUGGESTED DISTRIBUTION OF MARKS

Topic	Time Allotted (hrs)	Marks Allotted (Out of 50)
1	06	10
2	06	10
3	06	10
4	09	15
5	03	05
Total	30	50

2.4 ENVIRONMENTAL STUDIES

L	P
2	-

RATIONALE

Engineering activities require the use of natural resources which results in wide-ranging adverse effects on the environment. Natural replenishment of these resources is practically impossible. This necessitates that all technicians should know about the basics of ecology, environment and its functions, environmental pollution and management and environmental legislation which will enable them to accomplish their professional work with environmental compatibility. Hence this subject.

LEARNING OUTCOMES

After undergoing the subject, the student will be able to:

- Comprehend the importance of ecosystem and environment.
- Demonstrate interdisciplinary nature of environmental issues.
- Identify different types of environmental pollution and control measures.
- Take corrective measures for the abatement of environmental pollutions.
- Compute the impact of human activities on the environment.
- Understand purpose of environmental legislation acts.
- Define energy management, energy conservation and energy efficiency
- Demonstrate positive attitude towards judicious use of energy and environmental protection
- Practice energy efficient techniques in day-to-day life and industrial processes.
- Adopt cleaner productive technologies
- Identify the role of non-conventional energy resources in environmental protection.

DETAILED CONTENTS

1. Introduction: (4 hrs)
Basics of ecology, eco system and environment. Review of carbon, nitrogen, sulphur and water cycle)
2. Conservation of land reforms: (3 hrs)
Desertification, Causes, effects and prevention. rain water harvesting, maintenance of ground water, deforestation – its effects and control measures
3. Environmental Pollution: (10 hrs)
Sources of pollution - natural and man made, causes, effects and control measures of pollution (air, water, noise, soil and radioactive). Concept of BOD, COD and AQI, Prevention of Pollution- Introduction to Cleaner Production Technologies, Waste Minimization Techniques, Concept of Zero Discharge, Impact of Energy Usage on Environment: Global Warming, Green House Effect, Depletion of Ozone Layer, Acid Rain.

4. Solid Waste management (3 hrs)
Classification of refuse material, sources, effects and control measures. Introduction to E-waste Management
5. Environmental Legislation (4 hrs)
Introduction to Water (prevention and control of pollution) Act, Air (Prevention and Control of Pollution) Act and Environmental Protection Act, Role and Function of State Pollution Control Board, Introduction to Energy Conservation Act & its importance, Concept of Environmental Impact Assessment (EIA)
6. Energy Conservation and Sustainable Development (6 hrs)
Introduction to Energy Management, Energy Conservation, Energy efficiency and its need. Role of Non-conventional Energy Resources (Solar Energy, Wind Energy, Bio mass energy, hydro energy) in environmental protection. Sustainable development, Concept of Green building and eco friendly materials.

INSTRUCTIONAL STRATEGY

In addition to theoretical instructions, different activities pertaining to Environmental Studies like expert lectures, seminars, visits etc. may also be organized.

RECOMMENDED BOOKS

1. Sharma, BR, "Environmental and Pollution Awareness", Satya Prakashan, New Delhi.
2. Khitoliya, Dr. RK, "Environmental Pollution", S Chand Publishing, New Delhi.
3. Deswal and Deswal, "Environmental Science", Dhanpat Rai and Co. (P) Ltd. Delhi.
4. Bharucha, Erach, "Environmental Studies", University Press (India) Private Ltd., Hyderabad.
5. Dhamija, Suresh K, "Environmental Engineering and Management", SK Kataria and Sons, New Delhi

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Hrs)	Marks Allotted (Out of 60)
1	4	8
2	3	6
3	10	20
4	3	6
5	4	8
6	6	12
Total	30	60

2.5 BASIC ENGINEERING

L	P
2	2

RATIONALE

A diploma holder has to assist in activities of installation, operation and maintenance etc of different machines and equipment. These activities are not branch specific and instead require him to know basics of civil, electrical and mechanical engineering. The subject of Basic Engineering has been included to impart basic knowledge of civil, electrical and mechanical engineering to the students.

LEARNING OUTCOMES

After undergoing this course, the students will be able to:

- Demonstrate various drives used for power transmission.
- Explain working principle of various types of engines.
- Explain advantages and disadvantages of fluid power.
- Name various instruments used for measuring electrical quantities.
- Distinguish between high voltage and low voltage distribution system.
- Demonstrate electrical installation components used in single phase and three phase wiring.
- List applications of pump and motor
- Carry out testing of bricks and concrete.

DETAILED CONTENTS

Note: This is an introductory course to make the students aware about basic concepts and applications of civil, electrical and mechanical engineering. The examiner should avoid numerical problems, while setting the question paper in this subject.

PART-A

MECHANICAL ENGINEERING

- 1. Transmission of Power** (4 Hrs)
 - 1.1 Belt Drives: Types of belts, belt materials, cross and flat belt drives, advantages of V-belt drive over flat belt drive.
 - 1.2 Gears Drives: Types of gears, types of gear trains
 - 1.3 Use of cams in power transmission
- 2. Fluid Power Systems** (6hrs)

Introduction to Fluid power, Advantages and Applications, Fluid power systems, Types of fluids, Properties of fluids.

PRACTICAL EXERCISES IN MECHANICAL ENGINEERING

1. Demonstration and study of various drives for transmission of power i.e. models of belts.
2. Demonstration and study of various drives for transmission of power i.e. models of gears.

PART B

ELECTRICAL ENGINEERING

1. Basic Quantities of Electricity: (2 Hrs)
 - 1.1 Definition of voltage, current, power and energy with their units
 - 1.2 Name of the instruments used for measurement of quantities such as voltmeter, ammeter, wattmeter, energy meter.
 - 1.3 Connection of the instruments in electric circuit
2. Transmission and Distribution System (3 Hrs)
 - 2.1 Key diagram of 3 phase transmission and distribution system
 - 2.2 Distinction between high and low voltage distribution system
 - 2.3 Identification of three phase wires, neutral wires and the earth wire on a low voltage distribution system
 - 2.4 Identification of the voltage between phases and between one phase and neutral
3. Electrical Installation: (3 Hrs)
 - 3.1 Distinction between light and fan circuits and single and three phase power circuits, sub circuits
 - 3.2 Various accessories and parts of installation, identification of wiring systems, earthing
4. Electric Motors and Pumps: (2 Hrs)
 - 4.1 Types and various application of single phase and three phase motors
 - 4.2 Type of pumps and their applications

PRACTICAL EXERCISES IN ELECTRICAL ENGINEERING:

1. Use of Megger:

Objective: To make the students familiar with different uses of megger
2. Connection of a three phase motor and starter including fuses and reversing of direction of rotation.

Objective: Students may be made familiar with the equipment needed to control a three-phase motor
The students must experience that by changing any two phases, the direction of rotation is reversed.

3. Connection of a lamp, ceiling fan, socket outlet, geyser, floor grinder, voltage stabilizer etc.
Objective: Students may be made familiar with the different types of equipment and circuits used in the installations
4. Treatment of electric shock
Note: The teacher may give a demonstration how an electric shock must be treated.
Objective: Students must be trained to treat the persons suffering from an electric shock
5. Demonstration and study of installation components used in single phase and three phase wiring.
6. Demonstration and study of distribution line components.
7. Demonstration and study of a distribution Board.
Note: Students may be asked to study the distribution board in the institution and note down all accessories.
Objective: Students must be made familiar with the distribution board
8. Connections and taking reading of an energy meter (1ϕ & 3ϕ)
Objective: Students may be asked to connect an energy meter to a load and calibrate reading
9. Demonstration of pump set and its working
Objective: To tell use of the pump set

PART C

CIVIL ENGINEERING

1. Construction Materials (2 Hrs)
Basics of various construction materials such as sand, aggregate, stones, bricks, cement, steel and timber along with their uses, elements of brick masonry.
2. Foundations (3 Hrs)
Bearing capacity of soil and its importance. Types of various foundations, suitability of various foundations for heavy, light and vibrating machines
3. Basic Concept of Concrete (3 Hrs)
Various ingredients of concrete, different grades of concrete, water cement ratio, workability

4. RCC (2 Hrs)

Basics of reinforced cement concrete and its use (elementary knowledge)

PRACTICAL EXERCISES IN CIVIL ENGINEERING

1. Testing of bricks
 - a) Shape and size
 - b) Soundness test
 - c) Water absorption
 - d) Crushing strength
2. Testing of concrete
 - a) Slump test
 - b) Compressive Strength of concrete cube
3. The students should be taken to different construction sites to show them various construction materials, concreting process and construction of RCC structural elements, foundations and other civil works

INSTRUCTIONAL STRATEGY

While imparting instructions, teachers are expected to lay more emphasis on concepts and principles. It will be better if the classes for basic engineering are conducted in the laboratories and demonstrations are organized for explaining various concepts and principles. The teacher should avoid the numerical problems, while teaching the subject.

RECOMMENDED BOOKS

Mechanical Engineering

1. Adithan, M., "General Mechanical Engineering", TTTI, Chandigarh.
2. Jayagopal, "Basic Civil and Mechanical Engineering", Vikas Publications, New Delhi.
3. Khurmi, RS, and JK Gupta, "Theory of Machines", S. Chand and Company Ltd., New Delhi.

Electrical Engineering

1. Theraja, BL, "Electrical Technology Part 1: Basic Electrical Engineering", S Chand and Company, New Delhi.
2. Gupta, BR, "Principles of Electrical Engineering", S Chand and Company, New Delhi.
3. Mehta, VK, "Basic Electrical Engineering", S Chand and Company, New Delhi.
4. Dhogal, PS, "Basic Electrical Engineering", Tata McGraw Hill, New Delhi.
5. Sharma, BR, "Basic Electricity", Satya Parkashan, New Delhi.

Civil Engineering

1. Ghose, "Materials of Construction", Tata McGraw Hill Publishing Co., Ltd., New Delhi.
2. TTTI, Chandigarh, "Civil Engineering Materials", Tata McGraw Hill Publishing Co. Ltd., New Delhi.
3. Jha, J, and Sinha, "Building Construction", Khanna Publishers, Delhi.
4. Deodhar, SV, and Singhai, "Civil Engineering Materials", Khanna Publishers, Delhi.
5. Garg, SK, "Soil Mechanics and Foundation Engineering", Khanna Publishers, Delhi.

SUGGESTED DISTRIBUTION OF MARKS

Total	30	50

2.6 LEATHER MANUFACTURE – I

L P
3 6

RATIONALE

Diploma holders in Leather Technology are supposed to acquire fundamental knowledge of history of leather manufacture, anatomical structure, composition of hides, skins, proteins, curing, preservation, pre-tanning operations, chrome tanning etc for enabling them to perform effectively on the shop floor. Hence this subject is introduced in the curriculum. Teachers are expected to provide greater emphasis on developing relevant skills in the students.

LEARNING OUTCOMES

After undergoing this course, the students will be able to:

- Comprehend classification and grading of hides and skins.
- Explain physical and chemical composition of skin.
- Describe methods of curing hides and skins.
- Explain principles and methods of pre tanning operations.
- Interpret concept of tanning.
- Describe chemistry of chrome tanning process.
- Take health and safety precautions during pre-tanning and tanning operations.

DETAILED CONTENTS

1. Introduction (6 hrs)
History of Leather manufacture, flaying, availability, classification and grading of hides and skins, defects of hides and skins, anatomical structure of hides and skins, chemical composition and constituents of hides and skins
2. Proteins (6 hrs)
Nature and types of proteins, physical and chemical composition of skin proteins, reactions with acids, bases and salts (in brief)
3. Curing and Preservation (6 hrs)
Principles and methods of curing of hides and skins, merits and demerits of each method, code of practice for curing and preservation of hides and skins as per latest standard specifications. Storage and transportation of raw hides and skins.
4. Pre-tanning Operations (10 hrs)
Objectives, principles and methods of desalting, soaking, liming, deliming, bating, pickling, depickling, bleaching, and degreasing
5. Tanning (4 hrs)
Concept and definition of tanning, leather properties dependent on tanning. Types of tannages.

6. Chrome Tanning (10 hrs)

Werner's coordination theory of chrome compounds, Chemistry of chromium complexes, hydrolysis, olation, oxolation, polymerization, effect of masking salts. Factors influencing chrome tanning like pH, concentration time, temperature, neutral salts. Basification and basicity principles. Preparation of chrome liquors and chrome powders, self-basifying chrome powder. Chemistry of various chrome tanning methods. Mechanism of chrome tanning.

7. Occupational Health and Safety (3 hrs)

Hazardous substances involved in pre-tanning and tanning operations. Safety precautions

LIST OF PRACTICALS

1. Grading of raw hides and skins as per commercial practice.
2. Tannery practice: Beam house and chrome tanning operations only.
3. Wet blue making from cow and buffalo hides,
4. Wet blue making from sheep and goat skins.
5. Visit to hide market and flaying centers
6. Visit to tanneries.
7. Experience sharing lectures by representatives from industry.

INSTRUCTIONAL STRATEGY

This subject is one of the basic subjects for the diploma in leather technology. The teacher should lay lot of emphasis on developing thorough understanding of various facts, concepts, principles and practices involved in leather manufacturing. Teacher should design exercises and students should be given practice on solving the same using books, manuals, with the assistance of teachers. Visits to some of the small, medium and large-scale tanneries may also be arranged to expose the students about various processes. Students should be sent to market for collecting samples and catalogue of various raw materials used in tanneries.

RECOMMENDED BOOKS

1. Dutta, SS, "An Introduction to Principles of Leather Manufacture", Indian Leather Technologists Association, Kolkata.
2. Sarkar, KT, "Theory and Practice of Leather Manufacture".
3. Sharphouse, JH, "Leather Technicians Handbook", Leather Producers Association, Northampton, UK.
4. Tuck, D H, "Manufacture of Upper Leathers", Tropical Products Institute, London.
5. Thorstensen, T C, "Practical Leather Technology".

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Hrs)	Marks Allotted (Out of 50)
1	6	8
2	6	8
3	6	7
4	10	10
5	4	4
6	10	10
7	3	3
Total	45	50

2.7 ORGANIC CHEMISTRY-I

L P
3 2

RATIONALE

Diploma holders in leather technology are required to supervise laboratories and should have practical and theoretical understanding which is to be applied in leather manufacturing. It is very essential that the students should have adequate knowledge of theory and practical skills for enabling them to perform effectively and efficiently on the shop-floor. Hence through this subject, it is expected from the teacher to provide/lay greater emphasis on theory and practicals in organic chemistry which is necessary element and is part and parcel of the leather manufacturing principles and processes

LEARNING OUTCOMES

After undergoing this course, the students will be able to:

- Solve problems related to empirical and molecular formulae of organic compounds.
- Explain preparation, properties and uses of ethylene and acetylene.
- List uses of petroleum products.
- Explain preparation, properties and uses of ethylene glycol and glycerol.
- Explain preparation, properties and uses of diethyl ether.

DETAILED CONTENTS

- | | | |
|----|--|---------|
| 1. | Introduction | (6 hrs) |
| | Purification of organic compounds - crystallization, distillation and sublimation. detection of elements (N, S and halogens). Estimation of hydrogen and sulphur | |
| 2. | General Chemistry of Organic Compounds | (6 hrs) |
| | Problems on empirical and molecular formulae. Isomerism (structural and stereo) Hydrocarbon saturated and unsaturated. Substitution and addition reactions. Chlorination of methane. | |
| 3. | Unsaturated Hydrocarbons and Alkyl halides | (7 hrs) |
| | Preparation, properties and uses of ethylene and acetylene. Polymerisation of ethylene and acetylene. Alkyl halides - CH_3Cl and CH_3I | |
| 4. | Petroleum Products | (6 hrs) |
| | Theories of origin of petroleum. Fractional distillation of petroleum. Petroleum products and their uses | |

5. Alcohols (8 hrs)
Primary, secondary, tertiary alcohols. Difference between preparation of ethyl alcohol by fermentation of molasses. Preparation, properties and uses of ethylene glycol and glycerol
6. Ether (2 hrs)
Diethyl Ether - Preparation, properties and uses
7. Aldehydes (4 hrs)
Formaldehyde and acetaldehyde. Laboratory methods of preparation, properties and uses
8. Ketones (2 hrs)
Acetone-Laboratory method of preparation, properties and uses
9. Acids (4 hrs)
Laboratory methods of preparation, properties and uses of formic and oxalic acids

LIST OF PRACTICALS

1. Detection of Cl, Br, I, S and N in organic compounds.
2. Detection of functional groups like aldehyde.
3. Detection of functional group of ketones.
4. Detection of carboxylic group.
5. Detection of amino group (nitrogen content).
6. Detection of functional groups of carbohydrates.

INSTRUCTIONAL STRATEGY

The understanding of chemistry is a must for the students for better appreciation of leather technology subjects. Teachers should give brief introduction to various topics and they should try to develop a co-relation of chemistry and its applied aspects to leather technology. Teachers may give appropriate tutorial exercises to the students. Use of charts may be made during the theory classes. Experiments given in the list of practical should be performed by individual students under the supervision of teachers. The safety precautions, while working on experiments, should be taken to avoid any accidents.

RECOMMENDED BOOKS

1. Puri, Sharma, and Pathania, "Principles of Physical Chemistry".
2. Kuriaese, JC, and J Rajaram, "Chemistry in Engineering and Technology Vol. I and II".
3. Morison, RT, and RN Boyd, "Organic Chemistry", V Edition, Prentice Hall of India Pvt. Ltd., New Delhi 1990.
4. Tewari, KS, SN Mehrotra, and NK Vishnoi, "A Text Book of Organic Chemistry", Vikas Publishing House, New Delhi.
5. Perry, JH, "Chemical Engineering Handbook".
6. Kent, JA, "Riegel's Handbook of Industrial Chemistry", Ed., Van Nostrand Reinhold, 1974.
7. Austin, GT, "Shreve's Chemical Process Industries", 5th Edition, McGraw Hill International Book Co., Singapore 1984.

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Hrs)	Marks Allotted (Out of 50)

2	6	7
3	7	8
4	6	7
5	8	9
6	2	2
7	4	4
8	2	2
9	4	4
Total	45	50

TRAFFIC AWARENESS & ROAD SAFETY CAMP (II)

A diploma holder must have knowledge of various types of traffic rules and regulations. Road safety education is vital for people of all ages. As a responsible citizen, you should be aware of each and every road safety rules. Observation is the key skill you need in ensuring road safety. By obeying safety rules and regulations, you can save yourself and others on the road. This camp covers the basic concepts of traffic rules and safety. Lectures will be delivered on following broad topics with the coordination of Distt. Traffic police. There will be no exam for this camp.

1. Time management
2. Traffic light signals
3. Speed limits of vehicles
4. Schedule of offences
5. Dividing lines
6. Proper road Maintenance and Warnings
7. Test yourself
